

Service Plan

Making a difference

CooperSurgical®
Fertility Solutions

CooperSurgical is a global leader in IVF and reproductive genetics

In today's busy laboratories, downtime due to equipment failure is not an option. In fact, ensuring your equipment is fully functional is essential to the success of your laboratory.

CooperSurgical offers a range of contract options to suit your needs, including contracts providing preventative maintenance and repair service, reliable access to spare parts, product training and online handling of service requests.

We are a partner to your lab, helping to improve its efficiency and effectiveness.

Equipment you can rely on

Helping you focus on your core business

You need confidence that your equipment will not let you down. Regular maintenance and servicing will help ensure you are always ready to go.

We will work with you to make sure every piece of covered equipment is functioning to the best possible standards.

As a CooperSurgical Service Plan holder, you can have 100% confidence in the level of service and quality of parts you will receive.

Service documentation to meet your regulatory needs

Upon request, our Service team can provide full and up-to-date instrument maintenance records, installation qualification (IQ) and operational qualification (OQ) to support your performance qualification (PQ) activities.

These records can help you to meet ISO15189 and other mandatory requirements for equipment and materials regulators, such as the Society for Assisted Reproductive Technology (SART) and the Centers for Disease Control and Prevention (CDC).

Only CooperSurgical Service Engineers are authorized to maintain and repair our products and supply approved parts.

Setting the standards in service

Our Service Engineers measure up to the highest professional standards. In practice, this means working to four operational commitments:

Product knowledge

Our global network of CooperSurgical® certified Service Engineers undertake in-depth training and regular follow up testing in everything from product features and technicalities to administrative tools and customer relationship training. To be a CooperSurgical Service Engineer requires commitment to ongoing attainment in technical and practical knowledge.

Spare parts

With a globally stocked spares inventory, we ensure that CooperSurgical Service Engineers have access to the correct stock of spare parts and the latest software patches. For our customers, this means that most problems can be resolved on the spot. If, for some reason, we don't have what's needed to rectify the issue, we can get it to you in the shortest possible time.

Peace of mind

Through annual preventative maintenance and servicing, our Service Engineers will keep your equipment in the best possible working order. Should an unexpected breakdown occur, we are there for you. Our dedicated First Line Support Engineers are easily contactable and backed up by a mobile field team.

Customer care and continuity

Actions taken are tracked and managed by our customer care system. For you, this means that our team will always be informed of your circumstances whenever you contact us, saving you time on the phone or at your computer explaining your issue.

Service options

- 1 Installation Services**
Getting you set up and ready to leverage your investment
- 2 Uptime Services**
Keeping your equipment at top performance and to help in achieving the highest uptime
- 3 Education/ Professional Services**
Services to help you maximize your product investment
- 4 Lifecycle solutions**
Keeping your equipment up to date and at peak condition

Our equipment service network

Working globally, acting locally

EMEA Service

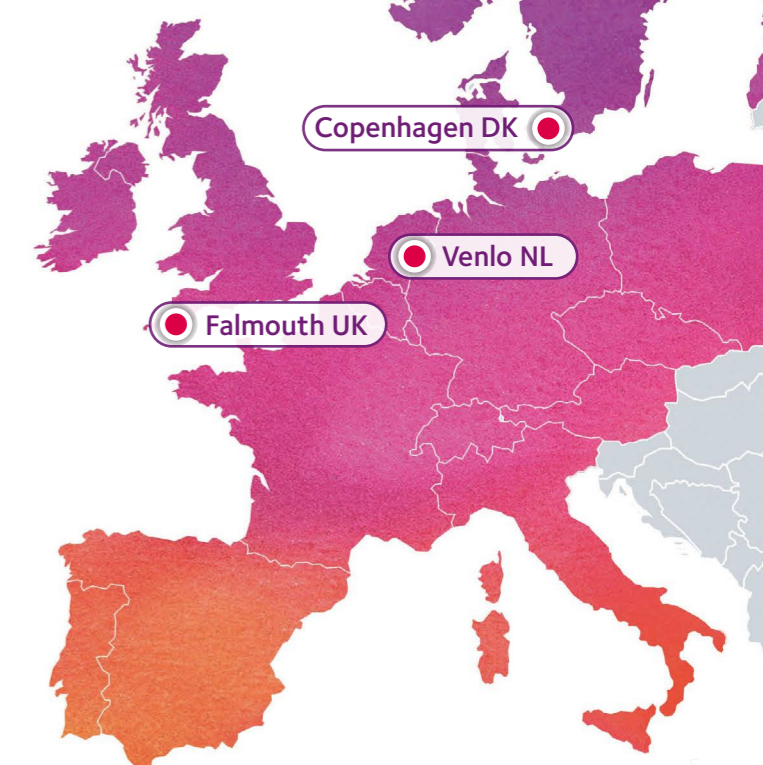

- >50 Certified Service team members locally based in the region to support you.

United Kingdom and Denmark

- First-line support team - close access to engineering and manufacturing teams
- Multi-language Service support / Scheduling team

Venlo, The Netherlands

- Dedicated Technical training center
- Global Distribution Center – planned/ expedited spare parts across the region

Serviceable Products and Equipment

CooperSurgical offers servicing for the following products:

RI products:

RI Integra 3™ Micromanipulator

RI Saturn 5™ Laser System

RI Witness™ System

K-Systems™ products:

L100 LAF Class I Workstation

L100 IVF Class I Workstation

L200 LAF Class II Workstation

L200 IVF Class II Workstation

L400 LAF Class I Workstation

L400 IVF Class Workstation

G210 Incubator

G185 Incubator

G85 Incubator

G95 Incubator

R65 Heated trolley

T45 Warming plate

T47 Warming plate

ORIGIO® products:

Fortuna™ IVF Class I Workstation

Fortuna LAF Class I Workstation

Mars™ IVF Class II Workstation

Mars LAF Class II Workstation

Titan™ IVF Class I Workstation

Titan LAF Class I Workstation

Planer BT37™ Mark I Incubator

Planer BT37™ Mark II Incubator

Scanfuge™ Centrifuges

Anti-Vibration Table

Other products:

Microscopes -
upright, stereozoom and inverted

RI Integra 3™ Micromanipulator

Service Overview

- Cleaning and lubrication of the device and components
- Replacement of consumable parts, e.g., bearings, springs, o-rings
- Complete set-up of system to eliminate freeplay and ensure all controls are centralized
- Full pipette set-up to ensure rapid pipette set up for end users
- Calibration of heated plates
- Pressure test of air syringes and replacement of seals if necessary
- Full system test to ensure correct operation

RI Saturn 5™ laser servicing

Service Overview

- Microscopic inspection and cleaning of the fiber optic patch cable ends
- Laser alignment to reduce the possibility of drilling into live cells
- Clean objectives, mirror module and control box
- Laser target calibration to ensure accuracy to <1 micron
- Objective calibration to ensure accuracy of software measuring tools
- Hole size calibration
- Full system test
- Software update, where applicable

RI Witness™ System servicing

Service Overview

- Tuning RFID antennas to ensure accurate reading of tags
- Temperature validation on each channel of heated plates and adjusting offsets where necessary
- Touchscreen calibration
- Check all cabling, tightening, replacing and tidying where necessary
- Check work area configuration software and amend where necessary
- Update RI Witness database, work area software and lab manager software to most current version.

K-Systems™ and ORIGIO® Class I workstations servicing

Service Overview

- Air flow calibration and air quality down flow test
- Pre filter change
- Heating system calibration
- Inspection of all seals
- Replacement of exterior humidifier tubing
- Inspection and cleaning of light source
- Cleaning and calibration of heated glass
- Software/firmware update

K-Systems and ORIGIO Class II workstations servicing

Service Overview

- Air flow calibration and air quality down flow test
- Filter change, if required
- Heating system calibration
- Inspection of all seals
- Verify alarm level settings
- Replacement of exterior humidifier tubing
- Inspection and cleaning of light source
- Calibration and cleaning of heated glass
- Software/firmware update
- Window adjustment and strap inspection (ORIGIO Mars)

Microscope servicing

Whether you have an inverted, stereozoom or upright microscope, CooperSurgical will be able to offer the high standard of service you have come to expect.

Service Overview

- Check for defects
- Cleaning of the frame and objectives
- Inspection of and cleaning of the eyepieces
- Full optical alignment of all adjustable optical components (Including Modulation Contrast, Phase Contrast & Differential Interference Contrast where fitted)
- Preventative maintenance replacement of the bulb (halogen only)

This is carried out on-site and can be included as part of the service visit for any other equipment we service, to minimize your downtime and maximize your benefits.

Where minor defects or issues are found, such as faulty eye pieces, we will endeavour to resolve them ourselves or if we detect a more serious issue, we facilitate the resolution of the issue through our network of approved microscope repair companies.*

*Extra charges for parts and labor may apply

BT37™/BT37™ Mark II Incubator servicing

Service Overview

- Complete calibration of the incubator
- Performance of relevant safety tests
- Inspection of air filter and replacement as required
- System and battery backup test
- Test of the chamber lid switches
- Battery exchange, to be performed every 3-4 years
- Inspection of lid seals and replace as required
- Inspection of the top heater plate ribbon cables

K-Systems™ incubators service G210 and G185

Service Overview

- Full system test
- Temperature calibration
- CO₂ and O₂ Gas calibration
- Change of inline HEPA and VOC filter
- Change of O₂ sensor
- Review and updating software status
- Change inlet filters
- Change CO₂ sensor as required
- Full documentation to include service report and data
- 12 months unlimited email and telephone support

Small products servicing G85, G95, R65, T47, T45

Service Overview

- Full calibration
- Full system test
- Full battery test as required
- Full documentation to include service report and data

All other product servicing

For all other items sold by CooperSurgical, we will facilitate the resolution of the issue through our ongoing support. This will be provided by our Service department on a product specific basis.

First Line Support

All service inquiries can be directed to the Service Department at:

Phone: +44 (0) 1326 372 753

E-mail: servicesupport@coopersurgical.com

Address: CooperSurgical, Celsiusweg 35, Venlo, 5982 PR, The Netherlands

In case of emergency breakdown, first line support will assist you by phone or by scheduling a service visit. Lines open: 8am-4pm Monday to Friday (GMT).

Product Warranty

Equipment sold by CooperSurgical includes a warranty, as specified on the terms and conditions available on our website. Please refer to www.fertility.coopersurgical.com/commercial-terms-and-conditions/ for more information.

What next?
