

Wallace SureView®

Ultrasound Visible Embryo Transfer Catheters

Cross section illustrating micro bubbles and smooth internal lumen

SureView catheter shown within the uterus

SureView micro bubbles are present throughout catheter length

Wallace SureView®

The unique SureView catheter allows full visibility under ultrasound while incorporating the hand crafted tip of the widely successful Classic catheter

- Visible under ultrasound from hub to tip¹
- More accuracy and confidence when positioning catheter tip within uterus for embryo transfer
- Combines benefits of the Classic range with SureView patented technology
- Compatible with the Wallace Malleable Stylet for difficult transfers
- The SureView range is fully compatible with the Classic range
- The only hand crafted catheter available in the world. Ensures tips are perfectly rounded for gentle insertion
- Every catheter has been inspected under magnification to ensure consistent quality
- Formable, non-friction sheath, ensuring a smooth transfer and the ability to conform to the contours of the cervical canal
