

# New Preimplantation Genetic Testing Nomenclature

New worldwide nomenclature for preimplantation genetic screening and diagnosis (PGS and PGD) has been announced by ICMART (the International Committee for Monitoring Assisted Reproductive Technologies), in partnership with ASRM, ESHRE, and other professional medical societies.

See below for the updated test names. We will be transitioning to this new terminology over the coming weeks; during this transition, you will see both current and new terminology used on CooperGenomics' order forms, consent forms, and test reports, among other materials.

## New terms

## Previous terms

### PGT-A

Preimplantation Genetic Testing for Aneuploidies

### PGS

Preimplantation Genetic Screening

### PGT-M

Preimplantation Genetic Testing for Monogenic/Single Gene Defects

### PGD

Preimplantation Genetic Diagnosis for Single Gene Disorders

### PGT-SR

Preimplantation Genetic Testing for Chromosomal Structural Rearrangements

### PGD

Preimplantation Genetic Diagnosis for Chromosome Rearrangements

If you have any questions about this terminology update, please contact your CooperGenomics representative, email [globalsupport@coopergenomics.com](mailto:globalsupport@coopergenomics.com) or call **+44 (0)800 060 8395**
